

Marine Life Incursions

BRINGING YOU THE SILENT WORLD SINCE 2004

Aquanauts

Curriculum-based marine science incursion,

Suitable for all primary students (Syllabus stages 1-3).

Journey under the sea to discover a world of amazing creatures. See how they live and adapt to survive within their environment.

Since 2004, multi award-winning underwater cinematographer George Evatt has brought the sea to life to school students of all ages. George shares not only his passion for our marine environments, but also beautiful movie footage of over 100 different sea creatures and various hands-on specimens.

Students will enjoy an enriching, fun and interactive presentation that will encourage them to think and engage scientifically, ask questions and be curious about the natural environment around them.

George will take them on an underwater journey that will inspire them to help shape a sustainable future for our world's oceans.

Over 50-70 minutes students will observe and investigate:

-
- ✳ **The basic needs of living things and how they grow and change during their life cycle.**
 - ✳ **How different environments provide for the needs of living things.**
 - ✳ **Predator and prey relationships and how food chains work in a particular marine environment.**
 - ✳ **How daily and seasonal changes affect marine animals and environments.**
 - ✳ **How science and technology helps us understand the effects of human actions on environments and the survival of living things.**
 - ✳ **Threats to local coastal marine environments and how we can help to protect them.**

Suitability:	All primary years.
Duration:	50 - 70 minutes.
Cost:	\$6.00 per student + GST (min 100 students).
Requirements:	Darkened auditorium or classroom. Two tables for specimen display.
